Liberty Mobile Client
Softphone for the Liberty Communications Platform

mother
technologies

The Liberty Mobile Client connects via the Internet to the Liberty Communications Platform and brings full business desk-phone functionality to your mobile device. It can be configured to act as your only business extension or twinned with other extensions such as your desk-phone. It is ideal for roaming users who need their extension with them at all times.

Liberty Mobile Client MPTG

The Liberty Mobile Client is a modern unified communications app that adds feature-rich business telephony to your mobile device over WiFi or the 4G network.

Call Control

Extensive telephony call control features (e.g. Call, Answer, Transfer, Attended Transfer, Consult, Conference, Deflect, Toggle, Mute & Do Not Disturb)

Number Continuity

Deploy the Mobile Client as a user's primary device or twin it with a desk-phone. All of your devices can operate in a personal group and share your business phone number

Directories

Seamless integration with the Liberty Internal Directory, Speed Dial List, Global External Directories, Personal Directories, Outlook Contacts and Imports

Presence

Control your presence (eg. Office, Meeting, Sick, Break, Gone Out, Vacation, Lunch, At Home & Do Not Disturb)

Conversations

Historical Journal for tracking call and voicemail events

Multi OS Support

The Mobile Client is available for Android and IOS devices.
